1 Keep all cords out of walkways and as close to baseboards as possible.

2 Clean up spills immediately.

3 Add light! Overhead or centralized lighting can help you see a writing, a small step or exit.

4 Eliminate unnecessary small throws that could be tripping hazards.

5 Make sure bathmats have non-slip backing.

6 Label things in a large font, especially if it's toxic.

7 Use high contrast towels and rugs especially in bathrooms.

8 Use color contrasting color strips for stairs.

9 Keep clutter to a minimum and especially out of walkways.

10 Make sure you know where your pet is so you don't trip on them. Adding a bell to their collar is great option!
